Company Description:

The market leading Information Management System (IMS), SIMS, is currently used every day by 500 independent schools in the UK and many international schools. SIMS is a highly effective Management Information System (MIS), capable of analysing considerable quantities of data that are vital to the efficient running of a school. SIMS is an integrated system made up of a range of modules, allowing SIMS to be used for practically every business functions of a school – from maintaining pupil and staff contact details and managing the admissions process to the complex management and analysis of children's performance data.
