

**Dr Duncan Milne**  
**Director**  
**Smart Kids**

Duncan Milne is the author of 'Teaching the Brain to Read', a teacher-friendly version of his PhD in Education and Psychology. He is passionate about reading, both from a research and an intervention perspective. Duncan is director of Literacy Tools for Dyslexia International, a speaker for the National Association of Special Educational Needs (NASEN) and a co-founder of Smart Kids.

**Book: Teaching the Brain to Read**

**Author: Dr Duncan Milne**

**Use the power of neuroscience to develop better readers in your class!**

What must the brain learn in order to read effectively? Arm yourself with the most current neuroscientific information and start your students down the path to successful reading. With this guide to cutting-edge research, you'll find the keys to unlocking reading success in your students. Complete with brain diagrams and tables, you'll examine concepts including:

- understanding language acquisition
- incorporating modern research findings
- recognizing and overcoming reading problems
- developing a successful reading programme
