Company Description:

For around 20 years, SpaceKraft has been an innovator of interactive multi-sensory equipment and fully installed rooms to the benefit of children with special educational needs. Not only can users of sensory equipment benefit from the calming effects they provide, but by giving control of equipment by using specially designed switches, the multi-sensory room becomes an educational learning tool teaching "cause and effect", one of the main building blocks in cognitive development. Whether you are involved in teaching children with special educational needs, an official within a Ministry of Education, a company wishing to work with us or you just want a chat you will be most welcome on the SpaceKraft stand 30.
