Kuala Lumpur
55200
Malaysia

Company Description:

Welcome to Trax UK

Specialising in high speed data capture solutions using OMR and OCR/ICR technology Trax UK, formed in 1991, is a well known market leader recognised for its software systems, which are used for examinations, training, assessments, monitoring and surveys in all educational/training organisations covering a diverse range of market sectors including government, health, armed forces, police, major commercial organisations and education at all levels.

At this year's conference, Trax is showing its new integrated Schools Management system covering student attendance, assessments and tests/examinations. The software is able to keep track of student's attendance and performance over any time period with full historical data available and forms part of a new system intended for the Malaysian market.
